Allowable Subject Matter

1. Claims 1-17 are allowed.

Claim 1 is independent claim.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the present invention from the application discloses a printing system comprises "a printhead interface to output the composite strip to a printhead the printhead interface including: two output units, a first output unit providing a synchronization signal for multiple print engine/controller chips and a second output unit adapted to pulse a paper drive stepping motor, each output unit producing a pulse in a number of cycles until instructed to stop, the pulse defining a start of a next line".

The closest prior art such as Silverbrook et al. (US Patent No. 6,447,113 B1), which is recorded on IDS, discloses a digital printing system for printing on both surfaces of a sheet of print media includes both of print engines in an opposed. However, the above prior art, including an updated electronic text search, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2625
